

HAZARD / NEAR MISS / GOOD CATCH

WHY REPORT HAZARDS AND GOOD CATCHES?

Reporting hazards and near misses helps us to identify where we need to improve to make the workplace safer and recognise good practice.

HOW DO I REPORT HAZARDS AND NEAR MISSES?

There are two mechanisms, you can report via the Site Observation Record 'App' or by calling the M Group Services Incident Management Centre (Incident line)

DOES REPORTING A HAZARD OR NEAR MISS MEAN LOTS OF PAPERWORK?

No – Once it's reported; job done!!!!

WHAT IS A HAZARD?

Something that could cause injury or damage. This could be a sign blown over in the wind or an open excavation without barriers.

WHAT IS A NEAR MISS?

A situation where you had to act to prevent an incident or damage from occurring or where something happened that almost caused an incident.

This could be someone tripping on a sign blown over in the wind or someone walking close to an open excavation without barriers.

WHAT IS A GOOD CATCH?

This is where an individual or working party is recognised for achieving a zero harm, quality and sustainable approach to delivery of work.
