10th August 2023

Dear Phil

Capital Delivery Construction and Engineering Framework – Enterprise Lots FA08-01 – Lot A – Infrastructure (North East).

Further to your invitation to pre-qualify, dated 10th July 2023, we have pleasure of enclosing our submission for the supply of Enterprise Lot A - Infrastructure (North East).

This framework is of strategic importance to our Group as we seek to become a key supplier to Northumbrian Water Limited. We have invested heavily over recent years in ensuring we have the best resources and most innovative techniques available to successfully deliver infrastructure projects both inhouse and via our extensive national supply chain. We pride ourselves on our partnering ethos and have a proven track record in successful collaborative working models such as the Caledonian Water Alliance and Yorkshire Water's 'Programme for Yorkshire' enterprise.

Our local, in-house teams offer expert support to our clients and partners, providing a competent, capable basis on which to establish a robust and effective enterprise. We work hard to develop a culture of trust and cooperation across all our collaborative endeavours, acting in the best interests of the whole delivery team and always doing what is right for our programmes and enterprises.

We trust our submission meets with your approval and we look forward to partnering with Northumbrian Water Limited for the foreseeable future and together "*Creating, establishing and sustaining the Living Water Enterprise*".

Yours faithfully
For Morrison Water Services

John Rodgers
