

Work-related Skin Diseases (Dermatitis).

No	Activity	Hazard	Person(s) in Danger	Control Measures	Residual Risk Rating
05	All work activities that use substances that have the potential to cause skin disease.	<p>Hazardous substances</p> <p>Risks of skin redness, Scaling / Flaking, Blistering, Weeping, Cracking and Swelling - Dermatitis</p>	<p>Employees</p> <p>Contractors</p> <p>Public</p> <p>Visitors</p>	<ul style="list-style-type: none"> Avoid contact with hazardous substances that cause skin problems. Where avoidance is not possible, consider replacing the substance with something less harmful. Ensure a COSHH assessment is completed. Implement the controls detailed within your COSHH assessment. Protect your skin by wearing gloves suitable for the task you are undertaking. Ensure gloves are fit for purpose and replaced if damaged and / or show signs of excessive wear. Ensure suitable barrier creams are used when not wearing gloves. Wash any skin contamination promptly and dry hands thoroughly. Always carry out appropriate hand checks daily. Provide information and training to workers on the use of PPE and avoidance of skin disease. <p><i>If symptoms of any skin conditions appear, stop work immediately and report to your Line Manager.</i></p>	Low
